Do you need a large powerful scooter?

COMET ALPINE™
THE ALL-TERRAIN SOLUTION

WHICH SCOOTER IS RIGHT FOR YOU?

Yes, you can.®

FREE 24 Hour Roadside assistance program

Who Are 24/7 Roadservices?

24/7 Roadservices was established 10 years ago as a Roadside Assistance package for new and used car warranties. Following the success of Roadside Assistance as a backup for warranty, they decided to launch the program to the general public and the wholesale automotive industry.

Frequently Asked Questions

What does the 24 hour Roadside Assistance program provide Invacare customers?

.....
This program is not a repair service, it is simply a transport service for you and your mobility scooter. If something goes wrong with your mobility scooter and you are unable to drive home, just call 24/7 Roadservices on their 1800 number and they will send somebody to pick you and your scooter up, and transport you to an address of your choosing. You might elect to go directly to your Invacare dealer so the scooter may be serviced, or you might decide to go home and arrange to have your scooter serviced another day.

Nationwide Service Network

.....
Local service and maintenance support is close at hand via Invacare's Nationwide Service Network. You can either contact your local dealer directly or you can call 24/7 Road Services on 1800 008 616 and we will put you in contact with your nearest service agent.

How do become eligible for the 14 months FREE offer?

.....
Simple. If you purchase any Invacare mobility scooter, you need to ensure your Invacare approved dealer registers for your warranty online at the time of purchase*. Once your dealer has registered for your warranty, you will be automatically signed up for the program and can call the 1800 number any time you need to!

*If your dealer fails to register for your warranty at the time of purchase, you can arrange this at a later date however, you will not be registered for the 24 hour roadside assistance program until you are registered for your warranty.

What if I want to continue with the 24 hour Roadside Assistance program after my 14 months is up and how much will this cost?

.....
No problem! Just phone 24/7 Roadservices to sign up. They will talk you through the process. Annual fees are subject to change over time.

I live in a remote area. Can 24/7 Roadservices send someone to collect me if I break down?

.....
24/7 Roadservices is a national network of people to call on when you need help. We feel confident that no matter where you live, this service will be available for you.

NEW
with
18Amp Battery

Micro, Light, Portable: the Invacare Colibri

The new Invacare Colibri is a stylish, simple and colourful micro lightweight scooter, designed for those who enjoy a totally independent lifestyle. Thanks to the unique Invacare LiteLock™ system the scooter can easily be taken apart without the need for tools and fits neatly into any car boot.

- ✓ Fits easily into any car boot. **Great for tight spaces.**
- ✓ Powerful motor. **Travels up to 8km/h.**
- ✓ Full sized swivel seat. **Easy to get in and out of.**
- ✓ Simple dismantling. **For easy transportation.**

Effortless dismantling

Don't think - do it! Less than a minute is all that's needed to disassemble the Colibri for transportation.

Components weight

Front section	15.6 kg
Drive unit	9.6 kg
Seat	9.6 kg
Battery box 18 Ah	14.1 kg

Increased comfort

The soft, padded seat provides comfort during driving. For increased comfort there is also the optional 'easy fit' seat suspension kit.

Ergonomic Handlebar and Plastic Basket

For greater comfort and prevents fatigue in hands and wrists.

Choose from five great colours

Invacare® | Superior Safety Features

Hand brake

Ensures immediate braking if required.

Automatic speed reduction

This feature automatically reduces your speed around bends.

Full Suspension*

A fully suspended chassis provides a comfortable drive at all times.

*Suspension options available for Colibri

Full lighting system with dual bulb headlights

Dual headlights provide increased visibility. Indicators automatically go off after 20 seconds. Indicators can easily be programmed with or without an audible signal.

Low battery warning

A visual warning on the battery level display and an audio warning (beep), tells you when the battery needs recharging.

Integrated brake light

Heavy duty brake lighting warns people around you that the scooter is slowing down.

Audible reverse alert

An audible signal (beep) lets people know that the scooter is reversing.

Anti-tip wheels

Prevents the scooter from tipping backwards when climbing steep slopes or negotiating high obstacles.

Anti-corrosion chassis

Anti-corrosion-treated chassis prolongs the life of the scooter.

Large wheels

Provides greater feeling of safety when negotiating kerbs and obstacles.

Two-step disengaging lever

Prevents the scooter from accidentally free-wheeling.

Finite tiller movement

The tiller can be easily adjusted with a lever to suit your needs.

Control panel

A clear, intuitive keypad with domed buttons ensures accurate operation. LED and audio signals indicate when each function is activated.

Ergonomic steering

Prevents fatigue in arms and hands during long trips.

Built-in anti-splash guards

Protects electronics and transaxle from dirt and water.

Intelligent lighting system protection

Only the bulb that has blown goes out: all others remain lit (scooter is still visible).

Dependable electrics

Best-in-class quality wiring and electrical connections optimise reliability.

Guaranteed reliability

Maintenance and easy serviceability are key design features. Batteries and electronics are easily accessible.

Accessories and Features

Adjustable

Seat Raiser*

An electronic mechanism raises the seat to your preferred height.

** Only available for Comet Alpine*

Seat Suspension Module

Adds extra comfort during driving. Kits available for all scooters.

Safety

Off-board charging kit

Simple remove batteries to charge with the off-board charger kit.

Seat Belt

Ensures you are kept securely and comfortably in place.

Mirror

Moveable mirror can be mounted to the left or right.

Flag

Hour Counter

allows you to track scooter life by hours operated, perfect for anticipating regular service requirements.
